**Final Project**

Python Tkinter Notebook with Threading

Samet Şenol/190303013

Computer Engineering, Istanbul Arel University

Operating Systems

Dr. Aziz Kubilay Ovacıklı

In this project I made fully functional a Notebook program. The biggest problem here is the using thread and showing how powerful they are because in this project I can not prove how the things gone faster than usually it is.

Tkinter is one of the first library that I used when I start to coding in high school so doing this homework with Tkinter was really quick and easy.
